PROFESSIONAL SUMMARY

Computer Science Engineering student interested in Artificial Intelligence and Machine Learning also with hands-on experience in academic and personal projects. Eager to learn, build practical solutions, and gain real-world industry experience.

EDUCATION

Panipat Institute of Engineering and Technology
Bachelor of Technology in Computer Science Engineering (AI/ML)

Affiliated to Kurukshetra University
2023 – 2027

EXPERIENCE

AI Development Intern June – July 2026
TechZolo Technologies LLP. Hybrid

- Developed end-to-end AI applications, including data preprocessing, model training, API development, and deployment.

Machine Learning Project Intern July – August 2025
Fox Trading Solution, Noida Remote

- Developed and evaluated ML models for diabetes prediction, human action detection, and bike-sharing demand forecast.

Training and Internship program - AI/ML July 2024
SkillifyMe Hybrid

- Learned Artificial Intelligence & Machine Learning concepts using Python and build a Loan Approval Prediction model.

PROJECTS

UniHub - AI-Powered Campus Assistant | *LLM APIs, HTML/CSS/React.js, Firebase.*

- All-in-one campus platform for students to manage attendance, lecture schedules, assignments, results, events, marketplace, and student community interactions with smart assistant support and real-time updates.
- Integrated the AI assistant with campus data sources to provide quick, accurate, and context-aware responses.

AutoMark - Smart Attendance System | *Python, FastAPI, OpenCV, React, Firebase*

- Attendance management system that uses face recognition to automatically detect and mark student attendance with real-time monitoring, secure data handling, and reduced manual effort.

Cricket Analyzer | *Python, Pandas, NumPy, Matplotlib*

- A cricket data analysis and visualization system to analyze player and match statistics.

Web Development Projects | *HTML, CSS, JavaScript*

- Created responsive portfolio and other webpages with auth system, payment gateway, API key integration.

TECHNICAL SKILLS

Languages: Python, SQL, HTML/CSS, JavaScript

Libraries/Frameworks: React, NumPy, Pandas, Scikit-learn, Matplotlib, Seaborn, FastAPI

Data Science & ML: Data Preprocessing, Exploratory Data Analysis (EDA), Model Building, Model Evaluation

AI: Prompt Engineering, Generative AI, LLMs, Agentic AI & n8n

Tools/Platforms: Git, GitHub, Jupyter Notebook, VS Code, MySQL, Google Colab, Docker

Core CS: DSA, OOPs, OS, DBMS, Computer Networks

Soft Skills: Problem Solving, Leadership, Team Collaboration.

CERTIFICATIONS

Nvidia: Building LLM Applications With Prompt Engineering

Databricks: Generative AI

IIT Bombay EduPyramids: Python - 95%, HTML - 100%, C - 90%, JavaScript - 90%

AICTE : Idea Lab
